profile

I have recently I have recently completed my honours degree in Time Based Art and Digital Film at Duncan of Jordanstone College of Art and Design, Dundee. I have relocated back to Glasgow however I can be based in the Dundee area if required. I would like to build upon my knowledge of the television and film industry preferably within the camera department. During my time at University I have worked on numerous film projects learning skills in camera operating, lighting, photography and art direction. I also balanced my degree with seeking work outside University on various professional productions, primarily in roles within the camera department and as a production assistant.
